EXPERIENCE

Georgia Laws of Life — Team Leader, CRM Integration

Jan 2026- May 2026

As the team leader overseeing operations and data management, I guided my IT Capstone group through the end-to-end integration of Georgia Laws of Life's donor and contact records into the Little Green Light CRM platform, delegating tasks, coordinating timelines, and ensuring seamless data migration with minimal disruption to daily operations. By bringing the project to successful completion, I improved organizational reporting capabilities, streamlined donor communication workflows, and trained staff on platform functionality, resulting in a more efficient and scalable infrastructure for the nonprofit's development efforts.

Concert and Chamber Orchestra, Northview High School — Upright Bassist

Aug 2017- Dec 2020

As an integral part of the Orchestra, I was able to effectively cooperate and communicate with my bandmates to lead other musicians to the end goal of a well-performed piece.

House Band, School of Rock Johns Creek — House Bassist

Aug 2018 - Apr 2019 (Houseband 4.5)

With a rigorous practice and performance schedule of weekly rehearsals and a weekend gig, I developed key communication skills, which allowed my house band to settle disagreements and elevate our playing.

Uber Technologies Inc., — Driver

May 2022 - Present

As a delivery driver for Uber Eats, I must manage my time and customer satisfaction skills to best serve my local community.

SKILLS

Compatibility problem-solving on Windows Platforms.

PC and electrical appliance maintenance.

Hardware component familiarity.

Soldering.

Bassist.

LogMeIn Hamachi LAN Network experience.

Limited Java.

Electric Guitar/Bass Maintenance and Repair.

Python

SQL Database

.dia

Wireshark

Network Packet/Traffic Analysis

Kali Linux

BLE packet analysis

Adaptability

Communication

Accountability

AWARDS

“Best performance by an individual” School of Rock

Barco — *Monitor Installation Assistance*

Jan 2024

As hired help, 2 Barco employees and I performed 20+ workstation installs, which consisted of dismantling the previous workstation, removing and interchanging the monitor stands, and installing the 3 monitors per workstation. Teamwork was key to performing our tasks as effectively as possible.

EDUCATION

Northview High School, Johns Creek — *High School Education*

Aug 2017 - May 2021

Kennesaw State University, Kennesaw/Marietta — *Currently enrolled as an Information Technology Major – 3.61 GPA*

Aug 2021 - July 2026

Pertinent Classes, I have taken (Official Transcript Available Upon Request):

Pre-Calculus

Programming Problem Solving I (Java)

Programming Problem Solving I Lab (Java)

Composition II

Calculus

Programming Problem Solving II (C#)

Programming Problem Solving II Lab (C#)

Database Systems

Hardware & Software Concepts

Information Security Administration

IT Policy Law

Management and Information Technology Human-Computer Interaction

Wireless Security

Internet of Things Security

Op Sys Concepts & Admin

Ethical Hacking Defense

Web and Mobile App Security

Red Hot Chili Peppers Season

“Best performance by a group” School of Rock Red Hot Chili Peppers Season

PASSIONS

As I noted above, I have a genuine passion for hands-on computer work and music.

LANGUAGES

English: Fluent

French: Proficient

PROJECTS

YouTube to Spotify playlist converter— *Personal Project*

A simple program that scans the names of songs in a YouTube playlist by reading the HTML data. Then it creates a playlist based on the names gathered by the program.

<https://github.com/TheRealNickcheese/Round-2-Yt-to-Spotify-converter>

A playlist created with my program -

<https://open.spotify.com/playlist/2D5QrxTOSej6cX0zgSLjxg>

Nodsurge — *Band Project*

From June 2019 to December 2019, I was the Bassist in a 3 member metal band.

[Nodsurge full set @The Vinyl 9/14/19](#)

FTP Server and Client— *Personal Project*

In January 2025, I developed a program that enables two users to exchange files with each other. One user would host, and the other would download. It has a simple GUI using Tkinter, and it was created in Python.

<https://github.com/TheStudiosNickCheese/FTPNuker>

Basic Website— *Personal Project*

For class, we had to design a simple website using HTML and CSS
